a simple **first HTML code example**, often called a "Hello World" page, which includes the basic structure of an HTML5 document:

```html
<!DOCTYPE html>

<html lang="en">

<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <title>My First HTML Page</title>

</head>

<body>

    <h1>Hello, World!</h1>

    <p>Welcome to my first HTML page.</p>

</body>

</html>
```

Explanation of the Code:

- <!DOCTYPE html>: Declares this is an HTML5 document.

- <html lang="en">: Root element of the HTML page, with language set to English.

- <head>: Contains metadata like character encoding, viewport settings for responsiveness, and the page title.

- <title>: Sets the title displayed in the browser tab.

- <body>: Contains all visible content of the page.

- <h1>: A main heading.

- <p>: A paragraph of text.
